A fresh approach to hygiene
Welcome to our new catalogue

Kingfisher are a family business established for 22 years who are totally dedicated to providing solutions for our customers offering the highest level of service, support and value for money.

We are pleased to present you with our new catalogue displaying our wide, innovative range of quality Skin Care & Hygiene, First Aid, Spill Control & Containment products. These products are sourced from many parts of the world and have been carefully chosen to create a master range of market leading products providing you with the ultimate choice.

We pride ourselves on offering a friendly, reliable service which is vitally important to us to ensure full customer satisfaction and customer retention. We continuously strive to improve our products and customer service – creating a “win-win” situation.

Our business has been built on offering the best quality products at competitive and cost effective prices to a wide range of customers from many different market sectors including Cleaning and Hygiene, Industrial, Automotive, Medical, Agricultural, Marine, Health and Safety, Pest Control and more.

The detailed and succinct information within this catalogue will assist in your product selection and help your company meet many of the personal and environmental duty of care laws.

All products are available through one of our approved distributors. One should be detailed on the back cover of this catalogue. If not, finding one is only a phone call away.

Kingfisher are a family business established for 22 years who are totally dedicated to providing solutions for our customers offering the highest level of service, support and value for money.
Within many different working environments, including engineering, manufacturing, construction, transport and warehousing, there are many potential risks to the skin. If the skin is subject to high levels of stress or loss of moisture, the natural barrier function can be damaged.

**Particular risks and causes**
- Frequent or long contact with substances such as water-based cooling lubricants, acids and lyes, cleaning solutions and damp food.
- Intensive cleaning after contact with oil, grease and adhesive soils such as paints, glues etc.
- Sweating and contact with the moisture build-up inside gloves, causing skin softening.

**Do you realise the serious effects skin problems can have on your company?**
- Reduced workforce due to sickness absence from work.
- Recruiting and re-training costs.
- Lose the full productivity of your workforce.
- Large compensation claims.
- Lengthily and costly court procedures.
- Fines and embarrassing press headlines.
- De-motivated staff and low morale.

**Risks and Hazards to the Skin**
- Dehydration of the skin through the loss of water.

It pays to take the correct, preventative measures. Our full understanding of the needs and requirements of your industry has enabled us to offer you a proven and tailor-made approach with problem solving solutions that you can trust.

**Our Hanzl® skin care products & systems will help:**
- Keep your workforce safe, healthy and productive.
- Motivate your staff because they feel good about coming to work.
- Your staff to gain understanding as to the importance of skin care.
- Encourage them to comply with hygiene and skin protection protocols.
- Reduce the risk of skin problems occurring, such as industrial dermatitis.
- Minimise the risk of compensation claims from employees.
- Increase productivity and save costs by reducing the number of employees on sick leave.
- Ensure dispensers are placed correctly around the workplace, to encourage your employees to actually use the skin care creams.

**Skin Care Introduction**
Inadequate cleansing can cause skin disease. To avoid stressing the skin, cleansing should be as gentle as possible. Selection of the correct cleanser is very important. They should be selected according to their suitability for the type of dirt or soiling.

Skin Cleansing
Selection of the correct cleanser is very important. They should be selected according to their suitability for the type of dirt or soiling. To avoid stressing the skin, cleansing should be as gentle as possible. Inadequate cleansing can cause skin disease.

Skin Care
Your hands should be cared for regularly, especially after work. Skin care products protect against rough, dry and chapped skin and also help to ensure the skin’s natural protection function is upheld. Cared for skin not only looks better, it is also more resistant to day-to-day stress.

As part of our excellent, ‘hands-on’ service we also offer:

**Site Surveys**
We can offer a full site survey that is specific for your work environment. Identify the most applicable products required and the most suitable locations.

**Free Product Trials**
We can send you a free trial of the products we recommend for your employee’s needs.

**Skin Care Training**
Once the correct products and skin care systems are installed, we can train your staff to use them properly and increase their awareness as to the importance of skin care.

If only hands could talk...®

**SKIN CARE** Keeping hard working hands healthy & productive

Our tailor made approach includes the following three steps:

**Skin Protection**
Skin protection products help to prevent contact between the effective substance and the skin. It is vitally important to choose the correct product to ensure suitability for the substances being handled.

**Skin Cleansing**
Selection of the correct cleanser is very important. They should be selected according to their suitability for the type of dirt or soiling. To avoid stressing the skin, cleansing should be as gentle as possible. Inadequate cleansing can cause skin disease.

**Skin Care**
Your hands should be cared for regularly, especially after work. Skin care products protect against rough, dry and chapped skin and also help to ensure the skin’s natural protection function is upheld. Cared for skin not only looks better, it is also more resistant to day-to-day stress.

**Everyday hazards to the skin**

**Dehydration of the skin through the loss of water**

Dry skin may be an indication of serious skin damage which could lead to skin disease. Protection and care measures should be taken immediately!

As part of our excellent, ‘hands-on’ service we also offer:

**Site Surveys**
We can offer a full site survey that is specific for your work environment. Identify the most applicable products required and the most suitable locations.

**Free Product Trials**
We can send you a free trial of the products we recommend for your employee’s needs.

**Skin Care Training**
Once the correct products and skin care systems are installed, we can train your staff to use them properly and increase their awareness as to the importance of skin care.

If only hands could talk...®

**HANZL® ZONE Skin Safety Centres**
Any combination of Hanzl® Zone Wallboards can be specially made to suit your needs!

**features:**
- Study wall mounted boards holding a variety of products and dispensers, creating the ultimate 1 to 6 step skin care programme.
- All dispensers are very durable and will give many years of hassle free operation and are lifetime guaranteed!
- Wallboards include important employee guidelines which help employers meet their duty of care obligations.
- Select appropriate creams and hand cleaners to customise the wallboard to your employee’s needs.
- We will advise you as to the correct placement of dispensers and wallboards, to help ensure that your employees actually use the skin care creams. We strongly recommend that skin care creams are kept away from wash room areas and are situated at strategic locations around the workplace. An ideal location for skin care creams is near the clocking in/out machine.

**Three Different Hanzl® Zone Sizes**
Compact Wallboard W 500 x H 500 mm
Pro Wallboard W 800 x H 600 mm
Mega Wallboard W 1050 x H 600 mm

Please note: Combination of boards shown here are all examples – please specify what you require on your wallboard when ordering.

Your hands are the best tools you’ll ever own – so look after them!
STOP IT® Hand Protection Cream

features:
- Wash off hand protection system for dry work
- Works like an invisible glove
- Helps to protect against oil, grease, solvents, paints, glues, resins, alkalis, tar, varnishes, adhesives, fats, lacquers, graphite, silicones and many types of workshop grime and almost any substance that is not water based
- Contains no silicones, therefore can be used in paint shops
- Forms a dry elastic and strong protective film
- Proven for over 40 years and dermatologically tested
- Helps prevent rough, dry chapped skin
- Simply wash off with water after working, very little or no hand cleaner is necessary
- Helps to reduce skin disease by washing easier and quicker, saving water and using less soap
- Simple application with no sticky feeling and short drying time
- Dexterity and other skin functions are maintained
- Contains no preservatives
- Excellent skin compatibility, suitable for all skin types

greenO clean®
Environmentally Friendly Cleaner & Degreaser

All Purpose Cleaner And Degreaser

greenO clean® differs from other cleaning materials by having a very high amount of active ingredients. Even with a relatively low dose a very effective result is achieved. The fact that greenO clean® is so concentrated makes it very economical.

greenO clean® is biodegradable and because of that it is very environmentally desirable. The product has been tested and approved to be discharged into drains, purifying plants and into the sea or lakes (please check with your local water authority). For the same reason greenO clean® can be used for all kinds of cleaning situations with a clear conscience. Also the low dosage helps take care of our environment.

greenO clean® is an effective multi-purpose product. It helps to save you money as you do not need multiple cleaning products for different purposes.

Applications:
- Machines, motors and parts
- Workshops and factory floors and walls
- Steam cleaning and metal degreasing plants
- Manual cleaning, dipping and soaking
- Cars, trucks, buses, trains and ships
- Off-shore drilling rigs
- Equipment in food and graphic industries
- Windows and glass

Train and Truck Wash
Heavy duty acidic pre-treatment agent with corrosion protection for use in automated commercial vehicle and train washing systems and in high pressure jet washers. Foaming additive for the cleaning of trucks, construction vehicles, plant machinery and trains.

features:
- Removes contaminates like plaster, cement, lime and concrete
- Ideal for use on aluminium and stainless steel, quickly restores their shine
- Effectively removes soiling of rust, grease, oil, insects, heavy grime and bird droppings etc.
- Has rapid separating characteristics that does not influence oil separation systems.
- Biodegradable and free from Hydrochloric and Hydrofluoric acid

Heavy Duty Standard Floor Cleaner
Low foaming environmentally friendly floor cleaner for removal of heavy soiling of fat, grease etc. Use manually in mop buckets or with floor cleaning machines in large areas.

features:
- Use on cement floors, concrete, uncoated epoxy resin and polyurethane flooring. Ideal for large warehouses, factories or general production areas
- Moderate alkaline and can be used also on alkaline sensitive surfaces like limecrete
- Excellent for removing tyre marks from vehicles and forklifts and removes old wax and polymer coatings
- Extremely economical - 1L at 1% will clean a soiled floor area of 1000m² when using a floor cleaning machine

GreenO clean® Products

GreenO clean® Plus
An extremely environmentally friendly, economic and efficient cleaner with natural soap for use in floor cleaning machines and high pressure parts washers/cleaning machines. Low foaming additive for removing stubborn stains of oil, grease, scot and lubricants in industrial and workshop areas.

features:
- Multiple uses. Expertly cleans workshop floors, engines, wheels, chassis and all alkali-resistant surfaces
- Suitable for automated floor cleaning. Also for surface and parts cleaning with high pressure cleaners. Ideal for soaking oily or dirty parts. Can be used in mop buckets for floor cleaning
- High level of active ingredients promotes rapid streak-free drying of the cleaned surfaces. Can be used up to 80°C
- Has rapid separating characteristics and does not influence oil separation systems

GreenO clean® Intensive Jet-wash Cleaner
An extremely environmentally friendly, economic and efficient cleaner for high pressure steam-cleaning and jet washing. With special phosphate-free cleaning additive for washing car/van paintwork, steel, non-ferrous metals, painted surfaces and some light alloys.

features:
- Quickly and effectively removes oil, fat and mineral-based impurities and is extremely material-friendly
- For heavy industrial use, manufacturing, engine cleaning, degreasing and textile cleaning up to 100°C
- The product is very environmentally friendly and contains tensides that are biologically degradable
- Suitable for use in food industry
- Has rapid separating characteristics and does not influence oil separation systems

**Flybones® Mega**  
Large, powerful flycatcher unit – Glue-board system  
**Features:**  
- The Flybones® Mega uses high-power, shatterproof UV-A lamps to provide a strong attraction power to flying insects. When captured on the adhesive board, the insect is unable to escape and dies of dehydration.  
- Stylish design makes it a decorative and discreet machine that hides the captured insects from view.  
- Ideal for large food production factories and distribution centres where a high level of hygiene is required.  
- Extremely easy to clean and maintain - Simple to reload the adhesive paper refill  
- The product is made entirely from stainless steel, welded and treated for use in food preparation areas.  
- Can either be wall-mounted or suspended by chains  
- Effective range: 15 – 18m radius

**Flybones® Compact**  
Air extraction flycatcher unit  
**Features:**  
- Flying insects are attracted to the light attraction of the UV-C lamps. They are then drawn in by the suction of the fan and are held in the trap, where they die of dehydration because of the continual airflow.  
- Supplied with an internal UV-C lamp with germicidal action, which sterilizes the captured insects from microbes and bacteria.  
- Simple and hygienic to empty. When full the capture tray is simply removed, emptied and re-inserted into the unit.  
- Suitable for food preparation areas, small kitchens, dining areas, hospitals, offices, reception areas and shops.  
- Totally safe and very quiet, with soft plastic fan.  
- Effective range: 10 – 12m radius

**Flybones® Pro**  
Decorative flycatcher unit – Glue-board system  
**Features:**  
- An effective fly catcher which offers optimum hygiene with an aesthetically pleasing design.  
- Suitable for use in food production environments, retail shops, supermarkets, restaurants and hospitality suites.  
- Uses new technology UV-A lamps in a screw-in housing.  
- Provides large attraction area and easy bulb replacement.  
- Designed for indoor, wall-mounted applications only.  
- Casing surround made from stainless steel.  
- The adhesive board refills have a large capture area and are easy to change.  
- Effective range: 10 – 12m radius

**Flybones® Zap**  
Electric shock grid flycatcher unit  
**Features:**  
- Very sturdy construction and durable design, helps to ensure long life in even the worst working conditions.  
- Very easy to keep clean. Collection tray is easy to remove and clean.  
- As flying insects are drawn near to the unit by the powerful UV-A light, they are electrocuted by powerful 3000V electric grids (insects die before touching the grids).  
- Ideal for waste recycling centres and agricultural applications, where livestock are present.  
- Can either be wall-mounted or suspended by chains  
- IKP 4 rated for outdoor use.  
- Effective range: 15 – 18m radius

**Flybones® Mega** uses high-power, shatterproof UV-A lamps to provide a strong attraction power to flying insects. When captured on the adhesive board the insect is unable to escape and dies of dehydration. Stylish design makes it a decorative and discreet machine that hides the captured insects from view. Ideal for large food production factories and distribution centres where a high level of hygiene is required. Extremely easy to clean and maintain - Simple to reload the adhesive paper refill. The product is made entirely from stainless steel, welded and treated for food preparation areas. Can either be wall-mounted or suspended by chains. Effective range: 15 – 18m radius.

**Flybones® Compact** uses air extraction to attract and hold flying insects, allowing them to be easily collected and disposed of. It is suitable for food preparation areas, small kitchens, dining areas, hospitals, offices, reception areas and shops. It is totally safe and very quiet, with a soft plastic fan. Effective range: 10 – 12m radius.

**Flybones® Pro** offers an effective fly catcher with an aesthetically pleasing design, suitable for indoor use. It uses new technology UV-A lamps in a screw-in housing, providing large attraction area and easy bulb replacement. It is designed for indoor, wall-mounted applications and has a casing surround made from stainless steel. The adhesive board refills have a large capture area and are easy to change. Effective range: 10 – 12m radius.

**Flybones® Zap** is an electric shock grid flycatcher unit, with a very sturdy construction and durable design. It is very easy to keep clean and can either be wall-mounted or suspended by chains. It is IKP 4 rated for outdoor use and has an effective range of 15 – 18m radius.

**Rodent Repeller™**  
Controlling Rats, Mice & Grey Squirrel

Help prevent an infestation...!  
Every year rodents cause thousands of pounds worth of damage by gnawing through cables and other sensitive electrical apparatus. This can cause dangerous and inconvenient short circuits which can kill the animal. This can cause major interruptions in power and media supplies or even cause fires.

How much inconvenience would it cause if your machinery or I.T network got chewed? How would an infestation affect your company reputation as a quality supplier?

Traditional poisons can create rodent ‘comatessies’ and health risks within roof spaces, cavities or drains by the rodent dying in areas that are not easily to access. The dead rodents then cause extremely foul odours as they take weeks or months to slowly decay! Rodents can carry and cause diseases which can be passed on to humans with possible terrible and life threatening effects!

The answer to your problems is to try to stop the rodent from entering the property or sensitive area, or if they are already in the property to make the area very undesirable for them to stay. This is where the Rodent Repeller™ comes into its’ own! It is specially designed to prevent and disperse rodent infestation in confined spaces such as suspended ceilings/ceilings, floating floors, ceilings, ducting, electrical cupboards/panels and food areas etc.

Using patented technology the transducer emits vibrations at a uniform level of acoustic pressure. These signals propagate through the air shaping an acoustic pressure cone which has a vertex angle of 60°, and are reflected by non-sound absorbing solid bodies found in their path. The signals are able to give a protection of up to 8 metres from the exclusion point.  
The acoustic pressure cone across the effective area affects the rodents by altering their sense of orientation through their hypersensitive sense of hearing. This makes the device a superb weapon against unwanted pests and is a clean and humane way of dealing with what is sometimes a huge problem, if the animals are left to multiply!

Did you know? Rodents are becoming immune to rodenticides (poisons)!

For more information >
Example of RODENT REPELLER™ installed inside electrical chambers and orientated towards the cables entrance

1. The Rodent Repeller™ generates a cone of acoustic pressure having a vertex angle of 60 degrees.
2. This signal propagates in a straight line controlling rodents up to a distance of about 8 metres from the Rodent Repeller™.
3. Since the walls of the electrical chambers reflect the signal a diffuser must be installed inside each chamber.
4. The reflected signal completely saturates the internal area of the electrical chamber. This gives excellent protection from rodents.
5. Installation tip - Ensure you plan enough direct or indirect coverage from the units you install. Often more than one unit is required to ensure 100% area protection.
**Saline iWash® Products**

**Saline iWash®**

For general eye soiling

**features:**

- 5 minute rinse time on 500ml size compared with just 20 seconds on most competitor bottles giving you ample time to remove foreign bodies
- Very cost effective because less bottles are used to properly wash the eye
- 0.9% sterile sodium chloride solution
- Suitable and recommended for accidents to the eye involving foreign bodies (not chemicals). Complete with an ergonomic eye cap, a dust cap and clear instructions
- Durability and shelf life of 3 years from date of manufacture

**Washing/rinsing time:**

- 500ml bottle gives 5 minutes washing/rinsing time
- 200ml bottle gives 2 minutes washing/rinsing time

**Handy compact 200ml bottle can easily be kept in a vehicle, toolbox, first aid kit or belt bag**

**...simplicity, safety, flexibility**

**Emergency iWash® Stations**

Wall mounted

**features:**

- Easily installed close to the workstation
- Equipped with mirrors and pictograms to ensure rapid, correct rinsing in the event of an accident
- Only three quick and simple actions required to enable use of the product in an emergency
- Open or dustproof stations are available
- Dustproof station is very strongly constructed, made from the same material used in crash helmets
- Stations with 2 x 500ml saline iWash® give approximately 10 minutes rinsing time
- Dustproof station is fully mobile – take with you anywhere!

**Washing/rinsing time:**

- 200ml bottle gives 2 minutes washing/rinsing time
- 500ml bottle gives 5 minutes washing/rinsing time

**eyeVolution®**

Emergency eyewash and body shower with neutralising effect of up to 50 times more effective than ordinary water.

**features:**

- Rapid and effective neutralising agent for acids and alkalis in the eye or on the skin – 1L bottle has the same effect as 50L of normal tap water
- Immediate application could prevent permanent damage to the eyes; acids and alkalis can penetrate the cornea in just 45 seconds!
- Powerful 4.9% phosphate neutralising buffer which is not harmful, as these phosphate salts are already found in the body
- Could make the difference between losing or saving your sight!
- Could reduce time at hospital and time off work, thus saving money
- Tested and approved by doctors and eye specialists
- Long rinse time of 2 minutes (200ml) gives user plenty of time to treat both eyes and skin. 1L gives 2 minutes wash time

Double iWash® Solutions

Many eye accidents involve both eyes. Dust, dirt, chemicals and other harmful substances can enter the eye tissue within seconds and in the worst case lead to serious eye injuries.

The new Double iWash® sets new standards for first aid eye wash bottles by offering the ability to rinse both eyes at the same time – without losing valuable time! Double iWash® is therefore a necessary complement to your current eye wash system, and helps to create an even higher standard of safety in your workplace. Double iWash® rinses with a gentle even flow, washing away the damaging substances away from the eyes. The registered design of the eye device on the bottle helps to keep the eyes open during rinsing.

Washing/rinsing time:
- 500ml bottle gives 2 minutes washing/rinsing time
- 1L bottle gives 5 minutes washing/rinsing time

Saline Double iWash®

features:
- Sterile 0.9 % Sodium chloride solution
- For injuries with foreign bodies like dust, dirt etc.
- Complete with an eye device for rinsing both eyes at the same time
- Also for refilling of the Double iWash® stations

Double eyeVolution®

features:
- Sterile 4.9 % Phosphate buffer solution
- For neutralising of most acids and alkalis
- Complete with an eye device for washing both eyes at the same time
- Also for refilling of the Double iWash® station

Double iWash® Dustproof Station

features:
- Dust-proof wall station
- Contains 2 x 1L Saline Double iWash®, pictogram on the front side and a mirror inside the lid
- Especially suitable for dirty and dusty production areas
- Fully mobile – take with you anywhere!

Double iWash® Mixed Dustproof Station

features:
- Dust-proof wall station
- Contains 1 x 500ml Double eyeVolution® and 1 x 1L Double iWash®, pictogram on the front side and a mirror inside the lid
- Especially suitable for dusty production areas where there is a risk of eye injuries involving acids and alkalis

QuickFIX Plasters

The unique dispenser is the backbone of the system.

First-aid boxes are fine when a serious accident occurs, but there are hundreds of minor accidents at workplaces every day. Most of them only involve putting a plaster on a small cut – so you can go back to work straight away. The system is hygienic, simple, and always at hand. Apply a plaster and back to work.

features:
- Provides a remedy for most accidents rapidly, easily, and hygienically
- Can be operated with one hand
- Can be filled with different types of plasters as required
- Easy to see when the dispenser is empty
- Easy to stop bleeding – without soiling the other plasters
- Small dimensions make it easy to fit into virtually any space
- Contains a shelf for storing first-aid items
- Plasters are individually packed
- Can be locked so it can only be opened with a key

Made the right way up!

Do you take a plaster from the top of your current dispenser? What happens when blood spills onto other plasters? With QuickFIX you can stop bleeding without soiling the other plasters, because plasters are dispensed from the bottom of the dispenser.

FOR MORE INFORMATION >
QuickFix Plasters

Mixed Plaster Dispenser
The Mixed Plaster Dispenser combines both the water resistant and elastic plasters.

Water-resistant plasters are especially suitable for damp workplaces. The plasters are made of a protective, skin-friendly PE material that allows the skin to breathe.

Elastic textile plasters that conform to the movements of the skin so they are comfortable in use. The plasters are extremely skin-friendly and allow the skin to breathe.

Spill Control Introduction

Are you still struggling with mess and hassle caused by Primary Absorbents (Granules) when dealing with spills on your site?

Problem

Here are 6 good reasons why you should stop using granules and convert to secondary absorbents:

1. Health and Safety
Granules are a slip hazard. An accident in the workplace could lead to serious cost consequences to the company’s time, image and wastes money.

2. Save Time and Labour
Granules are very messy and take longer to clean up and dispose off. Secondary absorbents are strong, fast absorbing and quick and easy to clean up.

3. Effectiveness
Clay granules do not really absorb the spill. The granules just become coated with the liquid, which eventually starts to seep through. Secondary absorbent pads and socks are far more absorbent and far less wasteful. For example, our 1.2 meter absorbent socks will absorb up to 5.4L, and the 3m socks will absorb up to a massive 14L!!

4. Potential Damage to Machinery and the Environment
Granules can be very abrasive and could potentially cause hundreds of thousands of pounds worth of damage if they accidentally enter expensive machinery. Contaminated granules often get trodden around buildings and get spread around yards. They then get washed into drains, leading to contamination of waterways.

5. Weight
Bags of granules are heavy and awkward and are difficult to deploy quickly and easily in the event of a spill. The average weight of a bag of granules is 18–20kg. One box of 100 pads only weighs 8kg and will absorb more than 11 times the amount!

6. Lower Disposal Costs
Used granules have to be treated as hazardous waste and are very heavy and bulky. They take up a lot of space in hazardous waste bins which means the bins have to be emptied more often, resulting in higher disposal costs. Secondary absorbents take up less space in waste bins and they can also be incinerated, which helps to reduce disposal costs.

Solution

You can now improve your housekeeping and clean up spills more effectively with Secondary Absorbents (Pads, Rolls, Socks, Cushions).

Three Different Types of Absorbents:

Maintenance (Grey Products)
Multi-purpose absorbents for Oils, Fuels, Water, Coolants, Solvents and Mild Acids/Alkalis. The most cost effective absorbents for indoor applications (see pages 5 – 9).

Oil Only (White Products)
Absorbents for Oil, Fuel, Solvents and Petrochemicals – Not Water or Coolants (Hydrophobic – Will repel water). Use outside, ideal for absorbing oil off water (see pages 10 – 12).

Chemical (Yellow Products)
Special absorbents for most Acids, Solvents and Caustics. Safe to use with most chemicals. (see page 13).

Maintenance Absorbents
These absorbent products are very versatile and are designed to absorb and contain all non-aggressive fluids, both oil and water based.

features:
- Soak up and retain split liquids quickly
- High absorbent capacity
- Cost effective, clean and simple to use
- Strong and highly durable
- Absorb liquids such as oils, fuels, water, coolants, solvents, mild acids and alkalis.

Maintenance Pads

features:
- An excellent solution for dealing with everyday spillages and leaking machines around the workplace
- The main use of pads in spill kits is to absorb the majority of the split liquid once the spill has been contained
- Excellent for general wiping and for placing dirty/oily components and tools on
- Dimpled for extra strength
- Made of high quality, bonded, melt-blown polypropylene
- Just one Heavyweight Pad will absorb up to 1L of liquid!!

FOR OIL ONLY PADS SEE PAGE 41
FOR CHEMICAL PADS SEE PAGE 44

Maintenance Rolls

features:
- To roll out on walkways and large areas to catch leaks and overspray
- To line toolboxes and maintain clean work stations, surfaces and equipment
- To lay beneath anti-slip/anti-fatigue matting, helps prevent slips
- To tear-off pads for general wiping and absorbing spills
- To help improve your housekeeping and keep your facility looking clean and professional

The rolls are perforated and easy to dispense. They are an efficient and cost effective method for absorbing spills

Our absorbents can be dispensed in a number of different ways. We have flexible dispensing options to fit every need and application. Please see page 45 for details

Maintenance Socks

A fast and easy way of keeping your workplace clean and safe

features:
- Our absorbent socks are made with a knitted outer skin which allows liquids to be absorbed much quicker. It also allows the ability to expand freely as the inner expands
- Massive absorbent capacity
  - Our 1.2m socks will absorb up to 5.4L
  - Our 3m socks will absorb up to a massive 14L
- Excellent retention of liquids, once they have been absorbed
- Fit tightly around the base of leaking machines, containers and storage tanks
- Socks hug the floor tightly, following the contours of the floor surface to ensure 100% containment
- Clean and simple to use – do away with messy granules

Absorption rate after 5 minutes – The proof is in the absorbing!!
MAINTENANCE DRUM TOPPERS & CUSHIONS

Maintenance Drum Toppers
An innovative product to help keep your 210L drums clean and drip free

- Do away with drum drips, puddles and dirty rags
- Allows you to work quicker, cleaner and safer, no more oil on the floor
- With pre-cut holes to fit on your drums and around bung openings
- Highly absorbent with great retention ability to hold spill liquids
- Maintenance and Oil Only versions available

Maintenance Cushions
Once a spill has been contained, it is important to absorb the liquids off the floor as quickly as possible

- For high-volume leaks and spills, when there’s a need for more capacity than pads will absorb
- Excellent solution for catching machine and drum leaks and for repair jobs
- Can be used to seal drain gratings in the event of a spill, when there’s no drain cover available
- Ideal for soaking up oil in potholes on roads or unmade ground
- Just 1 Extra Large Cushion will absorb up to 10L of liquid!!

OIL ONLY ABSORBENTS

Oil Only Absorbents
Hydrophobic absorbents, which means that they do not absorb water and will float on water even when saturated, ideal for outside use

- Absorb oils, fuels, solvents and petrochemicals from water
- Most cost effective absorbents for use in bunds and separation pits, on outfalls, rivers, lakes, harbours and lagoons
- White in colour - alerts you to any leaks/spills from machinery, drums or barrels
- Help to prevent damage to the environment and wildlife

Oil Only Pads

- Soak up and retain spill liquids quickly
- Convenient, versatile solution to enable quick spill clean up
- Help to remove potential slip hazards
- Bonded-for extra strength and durability
- Just one heavyweight pad will absorb up to 1L of liquid!!

Oil Only Socks

- Ideal for outdoor spill applications and drum storage areas
- Totally repel rainwater and absorb oil-based liquids only
- Huge absorbent capacity - 1.2m sock absorbs up to 5.4ltrs

OIL ONLY ROLLS

**Also suitable for inside use – bright white colour shows up potentially dangerous machine leaks**

**Oil Only Rolls**

**features:**
- For use between railway lines, under garage car ramps, walkways, corridors etc
- Collects oil, fuel drips and leaks from machinery and vehicles
- An effective and safe method of preventing contamination of track ballast on railway lines and unmade ground in quarries etc
- Oil Only makes it ideal for outdoor use (Repels water)

**Oil Only Marine Booms**

Help to minimise environmental damage on land or water. If oil or fuel is spilt and runs into water it needs to be contained - Oil Only booms are the solution!
- Highly effective absorbent for spills in water applications due to their ability to float even when saturated
- For use on waste water troughs, outfalls, streams, rivers, lakes, harbours and lagoons
- Can be used to contain spills in the outdoors, even in the rain
- Made with strong external net fabric, complete with hooks and rings
- Booms can be clipped together to encircle and contain very large spills

<table>

**Oil Only Mini Marine Booms**
Remove oil and fuel from the water in your sump, bilge tank or pit
- A simple, safe, convenient and effective solution
- Includes strong rope for easy retrieval
- Made with strong external net fabric, complete with retaining ring
- Help your company preserve the environment and meet ISO 14001 standards
- Don’t risk fines and consequences of having oil wash down your drains into the nearby watercourses

Chemical Absorbents

Special absorbents for aggressive and non-aggressive liquids such as acids, solvents, oils and caustics

features:
- Designated yellow in colour for instant visual recognition that hazardous substances are being absorbed and to avoid improper use
- Suitable for applications from large chemical spills to cleaning up small, everyday, benchtop spills
- Ideal for laboratories, chemical storage plants, pharmaceutical manufacturing and other industries
- Specially treated to ensure that they do not degrade upon contact with aggressive, corrosive and concentrated liquids

Absorbent Dispenser Stands & Stations

All-in-One Absorbent Station

Don’t let your maintenance department and engineers ‘rob’ the site spill kits to deal with minor leaks and spills!!! Use a Day-to-Day Absorbent Station...

It is absolutely essential that spill kits on site are kept full, in case of a large spill occurring. Very often absorbents are ‘robbed’ from spill kits to deal with minor leaks and spills on a day-to-day basis. This could put the company at serious risk if a major spill occurred, as the spill kit would be depleted and unfit for purpose

- Centralise absorbents to a single location in the workplace
- Can be installed near your work station
- Ensure that absorbents are readily available and accessible
- Helps to encourage improved housekeeping measures
- Strong and robust to stand up to continuous daily use

features:
- 1 x Painted Steel Absorbent Stand
- 1 x 500mm Absorbent Roll
- 1 x Box of Heavy Weight Pads
- 1 x Box of 1.2m Absorbent Socks
- Available with Maintenance, Oil Only and Chemical Absorbents

<table>

Drain Covers

Polyurethane Drain Covers

Keep harmful and unwanted liquids out of your drains and away from waterways.

features:
- Made from 2-layers of thick polyurethane
- Bottom layer made of soft and flexible urethane, which moulds easily to uneven surfaces and creates a secure and tight drain seal
- Super strong top laminated layer, strengthens the drain cover and helps to prevent it stretching and ripping
- Resists oils, fuels, solvents and many chemicals
- Very durable and designed for continual outdoor use
- Re-usable, simple and easy to wipe clean
- Yellow in colour, makes it clearly identifiable. Makes other workers aware that a spill has occurred
- Drain opening must be overlapped by at least 6cm on all sides – please check your drain size before ordering
- Easy to roll up and store securely out of the way
- Holds and wall bracket keep drain cover secure and at hand
- Drain protection sign also available (Rigid Plastic)

UniPlug™ Clay Drain Covers

features:
- Made of a putty like layer of clay based composition
- Useful and effective solution for where the ground around the drains is rough or irregular (tarmac or concrete)
- Resistant to oils, fuels, solvents and many chemicals
- For emergency, once only use to temporarily seal a drain
- Very simple to apply – just peel off protective backing and press firmly in and around the drain cover
- As well as drains, these covers can be used for temporarily sealing holes in pick-up leaking drums or tankers

UniPlug™ Metal Storage Box

features:
- Wall mountable with hinged lid
- Holds up to 2 of the largest sized UniPlug™ clay drain covers
- Easy to check contents
- Very quick and easy to deploy

Pre Mixed Plug & Seal Putty

features:
- For emergency sealing of leaks from holes, tears and ruptures
- Product comes pre-mixed and ready for immediate application
- Stops leaks at their source very quickly and effectively
- Short term problem solver until contents of drum have been removed
- Stays in place for up to 24hrs
- Available in 0.5kg and 1kg tubs

Conical Drain Plugs

features:
- A quick and effective solution that offers ultimate protection in high risk drainage areas
- Made of very flexible polyurethane
- Durable and robust, with long operating life
- Removeable which allows your drain to function normally when not in place
- Can either be used permanently or as an emergency measure
- Range of sizes available to suit different drains

Spill Barrier

features:
- Use spill barriers to prevent spills from reaching drains and spreading throughout the workplace
- Forms a tight seal to divert liquids away from drains, equipment, stock, doorways and offices
- Helps to minimise environmental impact
- Very flexible non-absorbent polyurethane
- Washable and re-usable
- Resists water, oil and most chemicals
- Bright yellow colour for high visibility
- Join spill barriers together with corner and connection pieces
- Confine leaks around machines to help with quick and easy clean up
Special Value Spill Kits

50 Litre Special Value Spill Kits – Shoulder Bag

- 1 Yellow Shoulder Bag
- 2 Socks (80mm x 3m)
- 60 Pads (Heavyweight)
- 2 Waste Disposal Bags
- 1 Instruction & Contents Card

90 Litre Special Value Spill Kits – Wheeled Bin

- 1 Yellow 2-wheeled Bin
- 8 Socks (80mm x 3m)
- 150 Pads (Heavyweight)
- 8 Waste Disposal Bags
- 1 Instruction & Contents Card

210 Litre Special Value Spill Kits – Wheeled Bin

- 1 Yellow 2-wheeled Bin
- 8 socks (80mm x 3m)
- 150 Pads (Heavyweight)
- 8 Waste Disposal Bags
- 1 Instruction & Contents Card

Special Value Spill Kits – Economy Range

These kits contain the essential elements that you need to contain and clear up the event of a spill occurring.

50 Litre Special Value Spill Kits – Shoulder Bag

- 1 Yellow Shoulder Bag
- 2 Socks (80mm x 3m)
- 25 Pads (Heavyweight)
- 2 Waste Disposal Bags
- 1 Instruction & Contents Card

90 Litre Special Value Spill Kits – Wheeled Bin

- 1 Yellow 2-wheeled Bin
- 8 Socks (80mm x 3m)
- 150 Pads (Heavyweight)
- 8 Waste Disposal Bags
- 1 Instruction & Contents Card

210 Litre Special Value Spill Kits – Wheeled Bin

- 1 Yellow 2-wheeled Bin
- 8 socks (80mm x 3m)
- 150 Pads (Heavyweight)
- 8 Waste Disposal Bags
- 1 Instruction & Contents Card

Premium Value Spill Kits

Premium Spill Kits

Is your current spill kit fit for purpose? If you have an IBC stored on site, you need an 1100L spill kit.

1100 Litre IBC Wheeled Spill Kit

- 1 Yellow 4-Wheeled Bin
- 2 UniPlug™ Drain Cover (650mm x 450mm)
- 30 Socks (80mm x 3m)
- 10 Cushions (Large)
- 2 Rolls (500mm x 44m)
- 1 UniSorb™ Super 7L
- 1 Free Standing Spill Sign
- 1 Plug and Seal putty (1kg)
- 10 Waste Disposal bags
- 1 Caution Tape Roll
- 1 Non-spark safety shovel
- 1 Instruction & Contents Card

Premium Range Spill Kits

METAL BINS ALSO AVAILABLE

UniSorb™ Natural

- Fire retardant wood-fibre granules
- Lightweight – makes carrying granules a lot easier and allows you to carry twice as much at once, to the area of the spill
- Excellent Performance - UniSorb™ Natural absorbs up to 16L per bag. Kilo for kilo that is three times more than clay!
- Save labour and disposal costs – as this product is more absorbent, less granules have to be cleaned up and disposed of

UniSorb™ Natural Granules

- Code: GS9104
- Description: UniSorb™ Natural Granules
- Size: 8kg/20L
- Pack qty: 70 bags/80L
- Absorb cap: 16L/Bag

Spill Kit Accessories

800 Litre Wheeled Spill Kit

- 1 Yellow 4-Wheeled Bin
- 1 UniPlug™ Drain Cover (650mm x 450mm)
- 25 Socks (80mm x 3m)
- 250 Pads (Heavyweight)
- 10 Cushions (Large)
- 2 Rolls (500mm x 44m)
- 1 UniSorb™ Super 7L
- 1 Free Standing Spill Sign
- 1 Plug and Seal putty (1kg)
- 10 Waste Disposal bags
- 1 Caution Tape Roll
- 1 Non-spark safety shovel
- 1 Instruction & Contents Card

Spill Control & Containment

Loose/Granular Absorbents

UniSorb™ Super

- Universal liquid absorbent powder which absorbs liquid spills instantly.
- By weight this product absorbs up to 15 times more than clay granules.
- 7L container (approx 1.6kg) will absorb as much as a 25kg sack of standard clay absorbent granules.
- Effective for oil, paint, food, solvents, alcohol, biodiesel, water and other liquids.
- Ensures floors are left clean and dry with no film or marks. Non-abrasive.
- Reduces cleaning time and costs of labour, materials and disposal costs.
- 7L container with handle for easy carrying and dispensing.
- Warning: Do not use to absorb hydrofluoric acid.

Vehicle Spill Kits

Helps your vehicle drivers to be prepared if a spill occurs when delivering or transporting liquids, or when re-fuelling etc.

50 Litre Vehicle Spill Kit

- 1 Plastic Storage Cabinet with Hinged Lid (300 x 435 x 660mm)
- 11 UniPlug™ Drain Cover (650mm x 450mm)
- 4 Socks (80mm x 1.2m)
- 25 Pads (Heavyweight)
- 2 Waste Disposal Bags
- 1 Cushion (Large)
- 1 Instruction & Contents Card

Loose/Granular Absorbents & Vehicle Spill Kits

Spill Kit Accessories

Non-spark Safety Shovel

- When cleaning up a fuel or chemical spill, the only safe option is to use a plastic shovel. This helps to eliminate the chances of sparks flying off the shovel as it makes contact with the floor.
- Single-piece moulding made from polypropylene.
- Strong and durable shovel.

Spill Caution Tape

- Helps to warn others on site that a spill has occurred and keep the area clear until it has been cleaned up.
- Bright yellow with large, clear writing makes this tape very easy-to-read.

Free Standing Warning Spill Sign

- Highly visible safety warning sign helps to warn others on site that a spill has occurred and keep the area clear until it has been cleaned up.
- Helps to warn others on site that a spill has occurred and keep the area clear until it has been cleaned up.

Hazardous Waste Disposal Bags

- Dispose of your contaminated waste correctly and safely.
- Strong, heavy-duty polypropylene bags.
- With clean pre-printed writing, so that bags can clearly be identified as hazardous waste.

Spill Kit Security Tags

- It is essential that your spill kits are kept full with the correct amount of absorbents, at all times. If the contents are used to deal with minor leaks and spills, it will leave the spill kit depleted.
- A depleted spill kit will result in it being unfit for purpose and could put you at massive risk if a large spill occurred.
- Make the auditing and sealing of your spill kits easy with our tamperproof tags.
- Taps clearly show if spill kits have been opened or tampered with.

10kg Polywrapped Wipes

- 10kg bags of cleaned and compression packed wipes.
- Suitable for most industrial applications.

Premium White Cotton Wipes

- 10kg Polywrapped Wipes
- Suitable for most industrial applications.

Spill Control & Containment

Grit Bins, Rock Salt & Spreaders

Don’t slip up this winter... help avoid litigation and compensation claims!!!

Problem

Did you realise...?

- On average there are 11,000 ‘slip and trip’ accidents in the UK per year, costing employers an estimated £512 million!!!
- 80% of slip and trip accidents are caused by ice
- Most of the UK has over 100 nights of ground frost per year
- There are about 13,000 lawyers in the UK who are keen to help persons sue for slippages

- It is a lot cheaper to have ice control equipment in place than to be sued because you didn’t!!!

Grit your teeth and order now – don’t be caught cold!

Solution

Protect our Environment

- More and more companies throughout the UK are increasingly concerned with minimising their impact on the environment and demonstrating legal and regulatory compliance

- Oil is a particularly harmful pollutant. A small amount of oil causes a large problem. 5l of oil can cover an area of water the size of two football pitches
- Just 1l of solvent is enough to contaminate 100,000,000l of drinking water

Important Regulations & Pollution Prevention Guidelines

‘The Control of Pollution (Oil Storage) Regulations 2001’ and ‘The Water Environment (Oil Storage) Regulations 2006’, require that secondary containment, such as a bund or drip tray must be provided to catch any leaks and spillages from drums, IBCs and storage tanks. These apply to all premises storing more than 200l on site

As set out by the Environment Agency for England and Wales, the Pollution Prevention Guidelines (PPG-26) for storing and handling of drums and IBCs, defines the requirements that secondary containment must achieve:

- The secondary containment must be sufficient to contain at least 110% of the maximum contents of an oil tank, mobile bowser, IBC or drum greater than 200l. Drip trays must be able to hold at least 25% of the drum volume

- Where more than one container is stored, the secondary containment should have the capacity of storing 110% of the largest container or 25% of the total volume of the containers being stored, whichever is greater

The Environment Agency is responsible for enforcing these regulations. Refer to the PPG regulations for full details

Spill Containment Introduction

Benefits to you...

- Improves your working environment and helps to keep your workplace clean, tidy and efficient
- Fulfil your environmental responsibility and comply with Pollution Prevention Guidelines
- Safe storage of drums and IBCs
- Protect the environment

A spill on site could lead to huge costs for your company, if the correct measures are not taken

Can you afford for your corporate image to be damaged by embarrassing fines and press headlines if a spill caused environmental damage?

Is your site fully covered and protected from the risk of spills?

Push Along Salt Spreader

- Helps ensure a safe, even spread and reduce labour time
- Sturdy build with 20cm pneumatic tyres
- Reinforced gear box and rod control for grit release shutter

Top Opening Grit Bin

- For outdoor storage of grit and salt
- Easy to move with forklift access points
- Strong and robust design - resistant to cold weather

White De-Icing Rock Salt

- Top quality white rock salt, which doesn’t clog and spreads evenly
- Leaves virtually no residue or brown mess
- Packed in strong tear resistant 25kg bags

Rock Salt Winter Kit c/w 200l Bin, Red shovel and 8 x 25kg Bags

Heavy Duty 270L Towable Salt Spreader

- Super strong and robust salt spreader with steel hopper
- Fitted with stainless steel spreading disc
- Regulating rod to ensure an even, consistent spread (up to 12m)
- Suitable for forklifts or normal vehicle towing hitchs
- Hopper cover is also available

Did you realise...?

- On average there are 11,000 ‘slip and trip’ accidents in the UK per year, costing employers an estimated £512 million!!!
- 80% of slip and trip accidents are caused by ice
- Most of the UK has over 100 nights of ground frost per year
- There are about 13,000 lawyers in the UK who are keen to help persons sue for slippages

‘The Control of Pollution (Oil Storage) Regulations 2001’ and ‘The Water Environment (Oil Storage) Regulations 2006’, require that secondary containment, such as a bund or drip tray must be provided to catch any leaks and spillages from drums, IBCs and storage tanks. These apply to all premises storing more than 200l on site

As set out by the Environment Agency for England and Wales, the Pollution Prevention Guidelines (PPG-26) for storing and handling of drums and IBCs, defines the requirements that secondary containment must achieve:

**Spill Control & Containment**

**210L Drum Spill Pallets**

- Approved for storage of 210L drums to help your company comply with current storage regulations
- Help to improve your housekeeping on site
- Wide range available: spill pallets for 1 to 8 drum capacity
- Very tough and durable products made of polyethylene
- Corrosion free, suitable for use with most liquids
- Compatible with most forklifts and pallet trucks; easy to move around site
- Removable grating for easy cleaning and inspection of sumps

**Bunded Poly Workfloors**

- Moulded polyethylene workfloors for internal storage of 210L drums
- Ideal for use as a static spill containment area or as an internal liquid dispensing area
- Use as a quarantine area for leaking containers or a machine part cleaning area
- Units can be joined together using joining strips and connectors to provide workfloors as large as required
- Strong and durable platform, which is removable for easy cleaning
- Slip resistant surface on ramp and platforms for safe use
- Heavy duty access ramp locks onto workfloor with integrated locating pins and user friendly gradient for easy loading

Simple and easy to connect and join together to create a large workfloor

Drum Bunding

Bunded Hardcover Drum Storage Unit

- Rigid, double walled, chemical resistant and weather-tight polyethylene hardcore
- Ideal for outdoor storage of 210L chemical and oil drums
- Tall headspace easily accommodates rotary pump equipment and conical funnels
- Roll-top door design allows for use in limited space or next to buildings where swing doors would be a problem
- Can be padlocked shut to secure goods
- Forkliftable from both sides, whilst empty
- Large internal record/data storage pockets
- Forkliftable from both sides, whilst empty
- Can be padlocked shut to secure goods
- Made from strong and durable polyethylene
- Easy to position with forklift truck
- Made from strong and durable polyethylene
- Any leak or drips will be fully contained in the large integral sump
- Dispense from all four drums at any time – simple and convenient
- Ideal for easy and safe storage of 210L drums
- Maximise floor space by stacking 4 steel drums horizontally
- Stackable for easy transportation and storage
- Lightweight and easy to clean and handle. Resistant to most chemicals
- Lowered in by a forklift
- With ribs in dispensing area to keep containers above minor spills
- Made from strong and durable polyethylene
- Features:
  - Made of durable, double-walled polyethylene
  - With ribs in dispensing area to keep containers above minor spills
  - Easy to handle due to well balanced design, with barrel tightly secured with a ratchet strap
  - Safety support lock for easy vertical loading and storage
  - Ideal for storing smaller drums and containers (25L drums), especially where space is limited
  - Suitable for a wide variety of storage applications from aerosols, 5L to 210L drums and batteries
  - Low maintenance and easy to clean
  - Some cabinets come complete with storage shelves
  - Very strong and robust construction

Drum Dispensing Bund and Stacking Rack

- Features:
  - Quick transformation of a standard wooden pallet into a safely bunded pallet
  - Simply place the pallet converter over an existing pallet and it is ready to use
  - With a unique, compressible front which allows drums on a pallet to be lowered in by a forklift
  - Lightweight and easy to clean and handle. Resistant to most chemicals
  - Made from strong and durable polyethylene
  - 2 and 4 drum options
  - Made from strong and durable polyethylene
  - Easy to position with forklift truck
  - Made from strong and durable polyethylene
  - Any leak or drips will be fully contained in the large integral sump
  - Dispense from all four drums at any time – simple and convenient
  - Ideal for easy and safe storage of 210L drums
  - Maximise floor space by stacking 4 steel drums horizontally
  - Stackable for easy transportation and storage
  - Lightweight and easy to clean and handle. Resistant to most chemicals
  - Lowered in by a forklift
  - With ribs in dispensing area to keep containers above minor spills
  - Made from strong and durable polyethylene
  - Simple & Safe – Three Stage Operation

Spill Prevention Pallet Converter

- Features:
  - Quickly transforms a standard wooden pallet into a safely bunded pallet
  - Simply place the pallet converter over an existing pallet and it is ready to use
  - With a unique, compressible front which allows drums on a pallet to be lowered in by a forklift
  - Lightweight and easy to clean and handle. Resistant to most chemicals
  - Made from strong and durable polyethylene
  - 2 and 4 drum versions available

Small Drum Spill Pallets

- Poly Storage Cabinets

- Features:
  - Polyethylene cabinets, all with lockable doors and built-in sumps
  - Suitable for a wide variety of storage applications from aerosols, 5L to 210L drums and batteries
  - Low maintenance and easy to clean
  - Some cabinets come complete with storage shelves
  - Very strong and robust construction

Poly Containment Products

- Poly Storage Cabinets

- Features:
  - Polyethylene cabinets, all with lockable doors and built-in sumps
  - Suitable for a wide variety of storage applications from aerosols, 5L to 210L drums and batteries
  - Low maintenance and easy to clean
  - Some cabinets come complete with storage shelves
  - Very strong and robust construction

- Simple & Safe – Three Stage Operation

### Poly IBC Bunded Spill Pallets

**Features:**
- If a spill occurs from an IBC there is a huge risk of contamination and damage to the environment, resulting in massive clean-up costs and fines.
- Due to the large volumes being stored it is very important that IBCs are adequately and safely banded.
- Easy to keep clean, with removable grates.
- Made of durable polyethylene with high chemical resistance.
- With forklift points, to allow transportation around the workplace.
- Built-in and add-on dispensing area options to catch any drips or minor spills.
- Single or double IBC options available.

**Spill Control & Containment**

---
Hazardous Storage Cabinets

It is vital that employers and employees comply with the control of hazardous substances in all working environments. Our range of cabinets are designed to help provide safe and secure storage of hazardous substances as demanded by COSHH regulations.

features:
- 2-Point locking handles are set into the cabinet door to help ensure no ‘snags’ occur as people and equipment move past.
- Adjustable spill-retaining, galvanised shelves for superior spill management.
- Integral liquid-tight sump encourages the correct handling of spills through the use of absorbents.
- Bright yellow coating ensures the cabinets are clearly identifiable in the workplace.
- Stands raise cabinets by 500mm with adjustable feet for uneven surfaces.
- Wall cabinet version is also available.

Modulo™ Storage & Recycling Systems

features:
- Space saving, innovative storage and waste collection module for areas where space is limited
- Compact, vertical unit with very small footprint that is simple to empty and easy to clean. Easy to use and empty
- Enables easy colour coded source separation of collected waste
- Single, 2 or 3 drawer units available with removable 25L drawers fitted with easy carry handle
- Variety of colours are available for colour coding drawers
- Strong laminated wood structure fitted with four anti-slip plastic feet offers stability and durability

Areas of Application
- Central, communal recycling point in offices
- Under each desk within offices
- Reception areas and corridors
- Vending machines/cupboards
- Canteen/hotels and kitchens

How to order your Double or Triple Cabinet...

1. Double or Triple? Decide on how many drawers you require. Also consider the height you have available
2. Choose the cabinet finish that suits your environment best (White or Beech). Select the relevant product code
3. Choose from the range of single 25L drawer colours. You can have any colour combination - mixed colours or all the same
4. When placing your order, quote the relevant drawer colours from the table above

Happy storage and waste disposal...!

Modulo™ Storage & Recycling Systems

Modulo™ Double Cabinet

features:
- Holds 2 x 25L drawers (included)
- Strong laminated wood structure
- With four anti-slip plastic feet
- Supplied flat-packed
- Size: 400x250x680mm

Modulo™ Triple Cabinet

features:
- Holds 3 x 25L drawers (included)
- Strong laminated wood structure
- With four anti-slip plastic feet
- Supplied flat-packed
- Size: 400x250x1000mm

Electric Infrared Heaters
Heat is transferred by shortwave infrared radiation generated by the heater tube and reflector, with a temperature that is higher than the surrounding air. Objects and people in the environment absorb the radiation and they heat up.

**Benefits:**
- Efficient: 92% of energy used is turned into infrared heat, just like the sun. Instant on/off heat
- No noise, no dust and no combustion fumes
- Cost effective: Easy to install, no central heating unit or major building work required

**Royal Heater features:**
- High performance heaters; incorporating a 1.3kw or 2kw gold lamp
- IP23 rated - suitable for permanent outdoor use
- Wall mountable – supplied with mounting bracket (fully adjustable)
- Cast aluminium construction with highly polished reflector and safety guard
- 2kw version heats area up to 14m²

**Elite Heater features:**
- High quality, elegant, water and dust protected heater
- Provides superior levels of heat distribution from a compact and slimline chassis
- Utilises a glass screen-free combined reflector and body
- Constructed entirely from aluminium - will provide many years of effective and reliable service
- Wall mountable and can be used as a single or modular unit – IP45 rated for outdoor use
- 2kw version heats area up to 14m²

**Portable Heater features:**
- Portable, heavy duty floor standing heater
- Swivel head allows heat to be applied at a number of different angles
- Suitable for many commercial and industrial applications
- Constructed from heavy duty steel and aluminium
- Includes 2 x 1kw ruby lamps, with quality reflector and safety guards
- Easy to manoeuvre around the site – with push handle and roller wheels

**Outdoor Picnic Tables**
- Treated softwood
- Rectangle table available as a 6-seater option
- Round table available as a 6 or 8-seater option
- Bolt down kit also available for all picnic tables

**Outdoor Seating Bench features:**
- Solid hardwood
- High quality, durable seating bench
- Shaped and manufactured for extra comfort and style

### Terms & Conditions

**In the unlikely event that goods are delivered wrong or damaged as agreed, or where the goods are not suitable for the purpose for which they are intended, the Buyer has the right to return the goods and to claim full reimbursement of all costs incurred by the Buyer with the help of the Firm for the purchase of the goods by the Buyer.**

1. **DEFINITIONS**

   1.1 The following terms shall have the meanings given below.
   
   - **“Service”** shall mean any service, operation, act performed, or service performed by or which the Firm is engaged by the Buyer.
   - **“Firm”** shall mean the name inscribed on the face of any invoice or written note (in any case the one which the Firm will be issued by the Buyer).
   - **“Goods”** shall mean products, articles or things which are supplied by the Firm to the Buyer.
   - **“Buyer”** shall mean the person to whom Services are rendered or by whom the Goods are supplied by the Firm.
   - **“Apparatus”** shall mean any equipment, machinery or materials to which the Goods are fitted or by which the Goods are made.
   - **“Contract Price”** shall mean the price agreed for the provision of the Goods or Services.
   - **“Payment Date”** shall mean the date on which the Buyer is to pay the Firm.
   - **“Invoice”** shall mean a written or printed note containing the details of the Goods or Services provided by the Firm to the Buyer.

2. **PROCEDURE:**

   2.1 No order for the supply of Goods or Services shall be accepted by the Firm unless it is confirmed in writing by the Firm to the Buyer and contains the terms and conditions hereof.
   
   2.2 In the event of any alteration to the terms and conditions hereof or to any invoice or written note, the Buyer must, if asked, acknowledge the alteration in writing.

3. **CANCELLATION:**

   3.1 No cancellation by the Buyer is permitted except where expressly agreed in writing by the Firm.

4. **RISK:**

   4.1 The risk shall not pass to the Buyer until the Goods or Services are ready for collection at the premises of the Firm or as the case may be.

5. **TITLE:**

   5.1 No risk of loss or damage to the Goods or Services shall pass to the Buyer until the time of delivery.

6. **PRICES:**

   6.1 All prices quoted are those ruling at the date of dispatch or supply.

7. **DELIVERY:**

   7.1 The Firm shall not be liable for any loss whatsoever or howsoever caused by its non-delivery or the failure to make Goods or Services ready for collection on the due date.

8. **LOSS OR DAMAGE:**

   8.1 The Firm shall not be liable for any loss whatsoever or howsoever caused by its non-delivery or by the failure to make Goods or Services ready for collection at the premises of the Firm or as the case may be.

9. **RIGHTS OF BARGES, ETC:**

   9.1 The Firm reserves the right to repair or replace the Goods or perform the Services arising from circumstances outside the Firm's control, including circumstances of a cause outside the Firm's control, and the Firm's liability for death or personal injury resulting from negligence.

10. **WARRANTY:**

    10.1 No warranty is given or implied in connection with the supply of the Firm's Services or the sale of the Goods by the Firm.

11. **QUIT CLAIM:**

    11.1 The Buyer is hereby given notice that the Buyer has no right to claim damages for any delay in the delivery of the Goods or Services by the Firm to the Buyer or for any other reason.

12. **LEGAL Syntax:**

    12.1 All rights in the above legal syntax are reserved.
